Diploma Program - [REQUEST MORE INFORMATION](#)

Paramedical Esthetician (Advanced Medical Skin Care Specialist)

Description

Paramedical Estheticians work with plastic surgeons and dermatologists in pre-and postoperative skin care. Under the guidance of a licensed health care provider, they provide treatments that prepare the skin for surgery for a more comfortable healing process. In addition to studying techniques used in the medical community, students will study advanced skin care training marketable in spas and salons. Students will participate in a clinical setting to apply skills that have been acquired in the program. All students are required to complete at least 100 “services” as part of their practical training. A diploma will be awarded upon successful completion of this program.

Upon successful complete of the Paramedical Esthetician program, students may apply to receive their Florida State Registration Certificate as a Skin Care Specialist. Those students who do not have a social security number are not eligible for state licensure.

Objectives

The Paramedical Esthetician program will prepare students for an entry level position as a Paramedical Esthetician. Students will develop skills used to protect, heal and beautify the skin, while counteracting the aging process. Emphasis will be placed on areas applicable to cosmetic surgery, reconstructive surgery, dermato-pathology and body and facial treatments.

Prerequisites

Have a high school diploma or G.E.D.
Pass the entrance examination

Course Outline

To receive a diploma in Paramedical Esthetics, students must complete 54.0 credit hours in their major. This diploma program can be completed in 12 months for full-time day students or in 24 months for part-time evening students.
