

Improve patient care through training and education...

Our Perioperative educational programs offer an innovative approach focused on bringing specialized skills to educate nurses and technicians in departments such as Interventional Radiology, Cardiac Cath Lab, Endoscopy, Women's Breast Center, Ultrasound, MRI, and Nuclear Medicine in an effort to improve patient care outcomes and meet national standards of excellence. The instructional methodology of these programs combines theory with hands-on practice taught on site at your facility.

The Joint Commission National Patient Safety Goals

Goal 7

Reduce the risk of health care-associated infections.

NPSG.07.01.01 - Comply with either the current Centers for Disease Control and Prevention (CDC) hand hygiene guidelines or the current World Health Organization (WHO) hand hygiene guidelines.

NPSG.07.04.01 - Implement evidence-based practices to prevent central line-associated bloodstream infections.

NPSG.07.05.01 - Implement evidence-based practices for preventing surgical site infections.
